## Woolton Baths (1893) Restoration Project – March 2015 Update

Last November the WVRA's contractor carried out repairs to the Bath's roof as it was leaking in a number of places. Fortunately this work was completed prior to the onset of bad weather in December and the roof was made relatively watertight for winter.

At the time we were informed of additional work which needs to be done in the near future. This will be carried out in the coming months.

The volunteer engineers replacing the old pipework running to and from the filter to the swimming pool are now available to complete the job and should start in the near future.

Pictures and further details to follow shortly on our website when available.

Jane Eustance
